

# iSHARES CORPORATE BOND ETFs

Cover the corporate bond yield curve with iShares

**USIG**

**iShares Broad USD Investment Grade Corporate Bond ETF**

**IGIB**

**iShares 5-10 Year Investment Grade Corporate Bond ETF**

**IGSB**

**iShares 1-5 Year Investment Grade Corporate Bond ETF**

**IGLB**

**iShares 10+ Year Investment Grade Corporate Bond ETF**

## Key takeaways

### Low cost

0.04% expense ratio for USIG  
0.04% expense ratio for IGSB, IGIB & IGLB

### Broad diversification

Exposure to hundreds of investment grade corporate bonds in each bond ETF

### Modular

Designed to provide precision exposure to specific segments of the yield curve (1-5 years, 5-10 years, 10+ years) or broad exposure to the entire yield curve.

## Corporate bond exposure

The iShares corporate bond ETF suite seeks to provide broad, low cost, and diversified exposure to the U.S. corporate bond markets. These iShares bond ETFs offer investors both targeted, modular exposure (IGSB, IGIB, IGLB) and broad exposure (USIG) to the investment grade corporate bond market.

Investors can utilize iShares corporate bond ETFs to target specific maturity segments of the corporate bond market in order to manage portfolio duration, or access the entire yield curve for asset allocation.

## iShares corporate bond ETFs cover the yield curve

	IGSB	IGIB	IGLB	USIG
30-Day SEC Yield	5.17%	5.24%	5.43%	5.27%

**The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting [www.iShares.com](http://www.iShares.com) or [www.blackrock.com](http://www.blackrock.com).**

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Any applicable brokerage commissions will reduce returns. Beginning August 10, 2020, market price returns for BlackRock and iShares ETFs are calculated using the closing price and account for distributions from the fund. Prior to August 10, 2020, market price returns for BlackRock and iShares ETFs were calculated using the midpoint price and accounted for distributions from the fund. The midpoint is the average of the bid/ask prices at 4:00 PM ET (when NAV is normally determined for most ETFs). The returns shown do not represent the returns you would receive if you traded shares at other times.

Carefully consider the Funds' investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the Funds' prospectuses and, if available, summary prospectuses, which may be obtained by visiting [www.iShares.com](http://www.iShares.com) or [www.blackrock.com](http://www.blackrock.com). Read the prospectus carefully before investing.

**Investing involves risk, including possible loss of principal.**

Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Diversification may not protect against market risk or loss of principal. Transactions in shares of ETFs may result in brokerage commissions and will generate tax consequences. All regulated investment companies are obliged to distribute portfolio gains to shareholders.
