REPORT OF THE MANAGEMENT BOARD FOR ISHARES DOW JONES GLOBAL TITANS 50 UCITS ETF (DE)

Report of the Management Board

Dear Investors,

In 2025, BlackRock Asset Management Deutschland AG (“BAMDE”) further strengthened its position in the ETF market. Within the market relevant to BAMDE, iShares remains the largest ETF provider in Europe based on assets under management. The European market for ETPs and ETFs continued to develop dynamically in the subsequent periods. This development particularly benefited BlackRock’s iShares business and, indirectly, the iShares ETFs managed by BAMDE in Germany.

In 2025, iShares achieved a European market share of new business of 35% (previous year: 34%), thereby successfully maintaining its position despite increasing competitive pressure and significantly exceeding the forecast of 7.6% issued in the previous year for the 2025 financial year. This development underlines the strong market position of the iShares brand in the European ETF segment.

iShares’ ETF offering currently comprises approximately 810 share classes authorised in Germany. This enables investors in Germany to gain broad and diversified access to a wide range of global markets and asset classes. A portion of these asset classes (approximately 66) is launched directly in Germany and can be identified by “(DE)” in the fund name.

As at 30 April 2026, the total assets managed internally and externally across the 34 special funds (Sondervermögen) and the 22 sub-funds authorised for distribution of the iShares (DE) I Investmentaktiengesellschaft amounted to EUR 70.9 billion (previous year: EUR 56.3 billion). Of this total, EUR 52.0 billion related to assets internally managed by BlackRock Asset Management Deutschland AG across the 34 special funds, while EUR 18.9 billion was attributable to the 22 sub-funds of the iShares (DE) I Investmentaktiengesellschaft.

According to preliminary calculations by the Federal Statistical Office (Destatis), Germany’s price- and calendar-adjusted gross domestic product (GDP) increased by 0.3% in the first quarter of 2026 compared to the fourth quarter of 2025. GDP thus continued to grow following an increase at the end of 2025. This growth was primarily driven by higher household and government consumption expenditure as well as rising exports.

In the first quarter of 2026, investors were once again faced with a challenging market environment, characterised by an initially stable start to the year followed by a marked deterioration over the course of the quarter. While capital markets at the beginning of the year were supported by robust economic data, easing inflationary pressure, and positive earnings expectations, uncertainty increased noticeably as the quarter progressed.

In particular, the escalation of geopolitical tensions in the Middle East led to significant market dislocations. Rising energy prices and disrupted supply chains increased inflationary pressure and triggered a reassessment of monetary policy expectations. As a result, volatility increased significantly, with equity markets in particular experiencing declines and investor risk appetite weakening.

The initially dominant expectation of further interest rate cuts was increasingly reassessed during the quarter. Central banks, particularly in the United States and Europe, signalled a more cautious stance in light of persistent inflation risks and geopolitical uncertainties. This led to heightened market sensitivity to macroeconomic data and political developments.

At the same time, the overall economic environment remained characterised by moderate but stable growth. The US economy remained comparatively robust, while Europe showed more subdued development. In Germany as well, the first quarter saw a moderate improvement in overall economic activity despite ongoing external uncertainties.

Structurally, the market environment continued to be shaped by long-term trends. The importance of artificial intelligence remained central, although initial shifts within the sector became evident — from highly valued growth segments towards infrastructure-driven and more broadly diversified business models. At the same time, traditional cyclical sectors, particularly energy and materials, temporarily gained importance, supported by developments in commodity prices.

Geopolitical fragmentation remained a key driver of uncertainty and market movements. Multiple concurrent conflicts, as well as increasing protectionist tendencies, influenced trade flows, capital allocation, and investment decisions, increasingly becoming a structural factor for capital markets.

Against this backdrop, investor behaviour also evolved. While strong inflows into equity products were observed at the beginning of the year, momentum weakened over the course of the quarter, accompanied by increased demand for more defensive asset classes. Overall, however, interest in ETF investments remained high, with continued significant inflows, particularly into European equity strategies.

Overall, the first quarter of 2026 was characterised by a transition towards a more macro-driven market regime. Investors increasingly faced the need to dynamically adjust portfolios, make more targeted use of diversification, and balance short-term risks with long-term structural opportunities.

With its broad product range aligned with investor and market needs, the Company considers itself well positioned for competition despite increasing pressure, partly resulting from the market entry of additional and, in some cases, large competitors, leading to rising margin pressure in the asset management industry. To maintain its position in the ETF market going forward, a wide range of customer-segment-specific and tailored distribution activities is planned.

REPORT OF THE MANAGEMENT BOARD FOR ISHARES DOW JONES GLOBAL TITANS 50 UCITS ETF (DE)

ANNUAL REPORT FOR ISHARES DOW JONES GLOBAL TITANS 50 UCITS ETF (DE) FOR THE REPORTING PERIOD FROM 01/05/2025 UNTIL 30/04/2026

Activity Report

Investment objectives and policies

The iShares Dow Jones Global Titans 50 UCITS ETF (DE) investment fund is a passively managed exchange-traded fund (ETF) that tracks the performance of the Dow Jones Global Titans 50^{SM} Index as closely as possible. The index measures the performance of 50 leading multinational companies from the S&P Global Broad Market Index (BMI). Index composition and weightings are selected based on test criteria such as free-float market capitalisation, revenue/income and net profit. The composition is reviewed annually and the components are rebalanced quarterly and capped at a maximum of 8%.

Structure of the investment fund with regard to investment objectives and significant changes during the reporting period

The fund's duplication rate compared to the benchmark index was 97.44% at the end of the reporting period. Inflows during the reporting period were also invested in accordance with the weighting of the stocks in the index. Dividends are accumulated within the fund.
The investment fund iShares Dow Jones Global Titans 50 UCITS ETF (DE) was an exclusively distributing fund until the introduction of share classes. On 6 May 2025, an accumulating share class was launched, in which the income received during the past financial year was reinvested. The distributing share class, on the other hand, distributes income after offsetting against expenses as part of interim distributions or six weeks after the end of the financial year.
The realised gains and losses result primarily from transactions with equities, which were carried out due to changes in the index, capital measures and the redemption of shares.
The index on which the ETF is based is regularly reviewed by the index provider in accordance with the index methodology and any resulting changes to the index (e.g. additions and deletions) are published. In the reporting year, the fund management's activities focused in particular on implementing these changes in the reporting period or on the reporting date. In addition, extraordinary index adjustments and changes in the fund due to capital measures were tracked accordingly.
In order to achieve the investment objective of tracking the performance of the Dow Jones Global Titans 50 ^{SM} index as closely as possible in the reporting period, fund management pursued an exclusively passive investment approach. Accordingly, as part of the fund management activities affecting this investment fund, no risks were actively managed or entered into.

Material risks and events in the reporting period

Market price risk
In the period under review, the investment fund was subject to the general and specific market price risk arising from individual stocks. Currency risk
As prescribed by the index, the investment fund invested in multinational equities in the reporting period. Therefore there was a high level of risk for EUR investors.

Credit risk
The management of credit risk for the investment fund is carried out within the risk management system of BlackRock Asset Management Deutschland AG. Due to the existing investment universe of the exchange-traded iShares ETFs, the credit risk is classified as low.

Counterparty risk
Counterparty risk for the investment fund is managed within the risk management system of BlackRock Asset Management Deutschland AG. The counterparty risk for the iShares ETFs in this investment fund is classified as low.

Operational risk
Operational risks for the investment fund are managed within the risk management system of BlackRock Asset Management Deutschland AG. The operational risks of the processes relevant to the investment fund are the subject of regular identification, analysis and monitoring. This is achieved, for example, through the use of instruments such as self-assessment, risk indicators and a loss database.
Business areas or processes which are relevant for this investment fund and which have been outsourced by BlackRock Asset Management Deutschland AG are subject to an outsourcing controlling process.
The investment fund did not incur any material losses from operational risks in the reporting period.

Geopolitical conflicts
The global environment continues to be affected by a number of geopolitical conflicts and tensions, including the ongoing conflict between Russia and Ukraine, tensions in the Middle East, and heightened geopolitical risk in relation to Taiwan. These conflicts, together with related economic sanctions, trade restrictions and regulatory measures, have contributed to increased market volatility and uncertainty in the global economy. The long-term consequences of these conflicts, including potential further escalation, spillover effects and additional sanctions, are difficult to assess at this time.

ANNUAL REPORT FOR ISHARES DOW JONES GLOBAL TITANS 50 UCITS ETF (DE) FOR THE REPORTING PERIOD FROM 01/05/2025 UNTIL 30/04/2026

Introduction of Liquidity Management Tools

Effective 16 April 2026, liquidity management tools have been implemented for the Fund in accordance with the Fund Risk Limitation Act (Fondsrisikobegrenzungsgesetz – FRiG), comprising dual pricing and a redemption fee (Rückgabegebühr), with the objective of mitigating potential dilution effects resulting from investor subscription and/or redemption activity.

Under the dual pricing mechanism, a modified net asset value per unit is determined for subscription and redemption transactions by applying an adjustment factor reflecting estimated liquidity and transaction costs associated with such transactions. This adjustment is applied in connection with the issue and redemption of units.

The redemption fee (Rückgabegebühr) represents a charge that may be levied on the redemption of units, calculated based on the gross redemption amount and amounting to up to 2% of such amount.

Information on staff remuneration pursuant to Section 101 Para. 4 KAGB

The below disclosures are made in respect of the remuneration policies of the BlackRock group ("BlackRock"), as they apply to BlackRock Asset Management Deutschland AG ("BAMDE"). The disclosures are made in accordance with the Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (“UCITS”), as amended, including in particular by Directive 2021/2261/EU of the European Parliament and of the council of 15 December 2021, (the “Directive”), and the "Guidelines on sound remuneration policies under the UCITS Directive" issued by the European Securities and Markets Authority.

BlackRock’s UCITS Remuneration Policy (the “UCITS Remuneration Policy”) will apply to the UK and EU entities within the BlackRock group authorised as a manager of UCITS funds in accordance with the Directive and will ensure compliance with the requirements of Article 14b of the Directive.

The UCITS Remuneration Policy remains under regular review and is updated as required to ensure compliance with all regulatory obligations. The UCITS Remuneration Policy was last reviewed in February 2026 where no material changes were made.

The UCITS Remuneration Policy,including the implementation of the Policy, is subject to annual independent review to ensure the Policy is consistent with the requirements of the Directives, as applicable, and that remuneration practices are consistent with the policies and procedures adopted by the Management Development and Compensation Committee (“MDCC”) (which is the global, independent remuneration committee for BlackRock, Inc.) and the BAMDE Management Board. The last review in 2025 did not identify any issues.

BlackRock operates a total remuneration model including a base salary that forms a sufficiently high proportion of employees’ total remuneration.

BlackRock also operates an annual discretionary bonus scheme. In determining specific individual remuneration amounts, a number of factors are considered including non-financial goals and objectives and overall financial and investment performance.

Discretionary bonus awards for all employees are subject to a guideline that determines the portion paid in cash and the portion granted in BlackRock, Inc. stock and subject to additional vesting/clawback conditions. The portion deferred into stock vests into three equal instalments over the three years following grant.

Quantitative Remuneration Disclosure

BAMDE is required under the Directive to make quantitative disclosures of remuneration. These disclosures are made in line with BlackRock’s interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops BlackRock may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated. Where such changes are made, this may result in disclosures in relation to a fund not being comparable to the disclosures made in the prior year, or in relation to other BlackRock fund disclosures in that same year. BlackRock bases its proportionality approach on a combination of factors that it is entitled to take into account under the relevant it is entitled to take into account under the relevant guidelines.

Remuneration information at the level of the individual funds is not readily available, would not be relevant or reliable. Disclosures are made in relation to (a) the employees of BAMDE; (b) employees who are members of the management; (c) employees who have the ability to materially influence the risk profile the risk profile of the fund; and (d) employees of companies to whom the portfolio management and risk management have been formally outsourced.

All individuals included in the aggregated figures disclosed are rewarded in line with BlackRock’s remuneration policy for their responsibilities across the relevant BlackRock business area. As all individuals have a number of areas of responsibilities, only the portion of remuneration for those individuals’ services attributable to BAMDE is included in the aggregate figures disclosed.

Members of staff and senior management of BAMDE typically provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of BAMDE and across the broader BlackRock group. Conversely, members of staff and senior management of the broader BlackRock group may provide both UCITS and non-UCITS related services in respect of multiple funds, clients and functions of the broader BlackRock group and of BAMDE. Therefore, the figures disclosed are a sum of individual’s portion of remuneration attributable to BAMDE according to an objective apportionment methodology which acknowledges the multiple-service nature of BAMDE and the broader BlackRock group. Accordingly, the figures are not representative of any individual’s actual remuneration or their remuneration structure.

However, whilst BlackRock considers ESG risks for all portfolios and these risks may coincide with environmental or social themes associated with the PAIs, unless stated otherwise in the prospectus, each/the Fund does not commit to considering PAIs in driving the selection of their investments.

The executive directors of the Investment Management Company are responsible for the other information. The other information comprises the parts of the publication "Annual Report", which we obtained prior to the date of our auditor's report – excluding cross-references to external information – with the exception of the audited annual report pursuant to § 7 KARBV and our auditor's report.

Our audit opinion on the annual report pursuant to § 7 KARBV does not cover the other information, and consequently we do not express an audit opinion or any other form of assurance conclusion thereon.

In connection with our audit, our responsibility is to read the other information mentioned above and, in so doing, to consider whether the other information

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 102 KAGB in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this annual report pursuant to § 7 KARBV.

INDEPENDENT AUDITORS REPORT FOR ISHARES DOW JONES GLOBAL TITANS 50 UCITS ETF (DE)

We exercise professional judgment and maintain professional skepticism throughout the audit. We also:

• Identify and assess the risks of material misstatement of the annual report pursuant to § 7 KARBV, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

• Obtain an understanding of internal control relevant to the audit of the annual report pursuant to § 7 KARBV in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of the internal control of the Investment Management Company or the arrangements and measures.
