**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

#### KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Index Methodology Risk: Although the benchmark index aims to seek exposure to securities with low volatility characteristics from within the Parent Index, there is no guarantee that this objective will be achieved.
- Volatility risk: The Fund tracks an index comprising securities with lower volatility historically. "Minimum volatility" in the Fund's name refers to its underlying index exposure and not to its trading price. There is no guarantee that the trading price of its shares on exchanges will have low volatility
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
