FUND OVERVIEW

The Fund is a sub-fund of iShares III plc and aims to deliver a return through a combination of capital growth and income by tracking the performance of the MSCI Europe Small Cap Index, its benchmark index.

KEY BENEFITS

1. Is passively managed and aims to invest, as far as possible and practicable, in equity securities (shares) that make up the MSCI Europe Small Cap Index.
2. The Index tracks the performance of small-capitalisation stocks across developed European markets and is free float-adjusted and market capitalisation-weighted, meaning it includes only shares readily available to investors
3. Uses optimising techniques to achieve a similar return to the Index. This may include the strategic selection of certain securities that make up the Index.

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realize returns that are different to the NAV performance. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.
