Unless otherwise stated, Performance, Portfolio Breakdowns and Net Assets information as at: 31-Jul-2026. All other data as at 07-Aug-2026.

This document is marketing material. For Investors in Switzerland. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks. For Professional Clients and Qualified Investors only.

FUND OVERVIEW

The Fund seeks to track the performance of an index composed of Japanese companies which also hedges JPY currency in the index back to CHF on a monthly basis.

KEY BENEFITS

1. Diversified exposure to Japanese companies
2. Direct investment in Japanese companies
3. Single country exposure and JPY exposure hedged back to CHF monthly

RISK INDICATOR

Lower Risk Potentially Lower Rewards

Higher Risk Potentially Higher Rewards

1	2	3	**4**	5	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Currency hedging may not completely eliminate currency risk in the Fund, and may affect the performance of the Fund.

Product Information

ISIN : IE00B8J37J31

Share Class Launch Date : 30-Nov-2012

Share Class Currency : CHF

Total Expense Ratio : 0.64%

Use of Income : Accumulating

Net Assets of Share Class (M) : 233.63 CHF

KEY FACTS

Asset Class : Equity

Benchmark : MSCI Japan 100% CHF NET hedged composite

The figures shown relate to past performance. **Past performance is not a reliable indicator of future performance. Markets could develop very differently in the future. It can help you to assess how the fund has been managed in the past** Performance is shown on a Net Asset Value (NAV) basis, with gross income reinvested where applicable. Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realize returns that are different to the NAV performance. The return of your investment may increase or decrease as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. GLOSSARY

SFDR Classification: Article 8: Products that promote environmental or social characteristics and promote good governance practices. **Article 9:** Products that have sustainable investments as an objective and follow good governance practices. **Other:** Products that do not meet the criteria to be classified as Article 8 or 9.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.
