July 2026

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-Jul-2026. All other data as at 10-Aug-2026.

This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The aim of the Fund is to provide a return(gross of charges) on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) by tracking closely the performance of the Morningstar Developed Europe ex-UK ESG Enhanced Index (the "Benchmark Index").
- The Fund invests in equity securities (e.g. shares) of companies that make up the Benchmark Index.
- The Benchmark Index aims to reflect the performance of a sub-set of equity securities within the Morningstar Developed Markets Europe ex-UK Target Market Exposure Index (the "Parent Index") which remain after the index provider has excluded securities using pre-defined ESG screens and weighted securities using an optimisation process, as determined by the index provider (as further described in the Fund's prospectus)..

RISK INDICATOR

Lower Risk — Potentially Lower Rewards

Higher Risk — Potentially Higher Rewards

1	2	3	4	**5**	6	7

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

KEY FACTS

Target 1 : Morningstar Developed Europe ex-UK ESG Enhanced UK12PM Net Index (GBP)

Asset Class : Equity

Fund Launch Date : 28-Sept-2022

Share Class Launch Date : 02-Feb-2022

GLOSSARY

Price to Book Ratio: represents the ratio of the current closing price of the share to the latest quarter's book value per share.

Price to Earnings: A valuation ratio of a company's current share price compared to its per-share earnings in the current forecast year, calculated as current share price divided by current earnings per share.
