This document is marketing material. For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

FUND OVERVIEW

- The Fund aims to provide a total return, considering both capital and income returns, reflecting the total return of developed and emerging equity markets in line with Shari'ah investment principles.
- The Fund is passively managed and will invest, in line with Islamic law (Shari'ah), in a portfolio of equity securities that so far as possible and practicable consists of the component securities of the WTW Islamic Global Equity Diversified Index, the Fund's benchmark index (Index). The Index, custom built by MSCI on criteria provided by Willis Towers Watson, aims to reflect the performance characteristics of a subset of equity securities within the MSCI ACWI Islamic M-Series Index (Parent Index). The Index applies stringent screens to exclude certain securities based on Shari'ah principles in agreement with the MSCI appointed Shari'ah board.
- The Fund uses optimising techniques to achieve a similar return to its Index, which include the strategic selection of certain securities that make up the Index. The Fund may hold securities which are not underlying constituents of the Index where such securities provide similar performance (with matching risk profile) to certain securities that make up the Index, provided that this is in line with Shari'ah.

RISK INDICATOR

Lower Risk

Potentially Lower Rewards

Higher Risk

Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Shari'ah funds do not pay interest and are prohibited from investing in businesses that are considered unlawful under Islamic principles. As a result, they may perform differently from other funds that do not follow Islamic principles.
- Multifactor funds employ a management approach using style factors whose impact they have on the fund's performance can be difficult to predict. Investors should consider this Fund as part of a broader investment strategy.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
