FUND OVERVIEW

The Fund seeks to track the performance of an index composed of companies related to businesses engaged in exploration and production of gold

KEY BENEFITS

1. Exposure to broadly diversified companies of gold related businesses
2. Direct investment into Gold producer companies
3. Gold producer sector exposure

RISK INDICATOR

Lower Risk Potentially Lower Rewards

Higher Risk Potentially Higher Rewards

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in mining securities are subject to sector-specific risks which include environmental or sustainability concerns, government policy, supply concerns and taxation. The variation in returns from mining securities is typically above average compared to other equity securities.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
