iShares Developed World Screened Index Fund (IE)

A sub-fund of BlackRock Index Selection Fund

Class D Accumulating USD

ISIN: IE00BYZ8K175

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the developed world equity markets excluding companies that are involved in or generate a majority of their revenue and income from activities that may have a detrimental impact from the environmental, social and governance (ESG) perspective.
- ▶ The Fund is passively managed and aims to invest in equity securities (e.g. shares) that, so far as possible and practicable, make up the MSCI World Screened Index (the "Index").
- ▶ The Fund's investments will, at the time of purchase, comply with the ESG requirements of the Index. The Fund may hold securities which do not comply with the ESG requirements of the Index until such time as the relevant securities cease to form part of the Index and it is possible and practicable (in the investment manager's view) to liquidate the position.
- ▶ The Index measures the performance of a sub-set of equity securities within the MSCI World Index (the Parent Index) which excludes issuers from the Parent Index based on the index provider's ESG exclusionary criteria. For further details please refer to the prospectus. The remaining securities are then weighted by their free-float adjusted market capitalisation. Free float adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the Index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market. The Index also excludes issuers which are identified by the index provider as being involved in controversies that have a negative ESG impact based on an MSCI ESG controversy score set by the index provider.
- ▶ The Parent Index measures the performance of large and mid-capitalisation shares across developed countries which comply with the index provider's size, liquidity and free-float criteria.
- ▶ The Fund adopts a binding and significant ESG integration approach to sustainable investing i.e. the Fund will integrate ESG information into investment processes to achieve a weighted average environmental rating of the Fund at least 20% better as compared to the Parent Index.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is US\$100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
