iShares ESG Screened Overseas Corporate Bond Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class S Accumulating GBP Hedged

ISIN: GB00BN091370

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets), by tracking closely the performance of the ICE ESG Global Corporate Ex GBP Index (the Fund's benchmark index).
- ▶ The Fund is passively managed and the Investment Manager (IM) has limited discretion to select the Fund's investments and in doing so may take into consideration the benchmark index. The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The Fund's benchmark index measures the performance of fixed income securities issued by companies in global markets excluding issues denominated in Pounds Sterling. The Fund's benchmark index also seeks to exclude issuers based on the index provider's environmental, social and governance (ESG) ratings and exclusionary criteria. The benchmark index excludes issuers based on their involvement in certain activities deemed by the index provider to have negative environmental or social outcomes based on their involvement in the following business lines/activities (or related activities): tobacco, nuclear weapons, thermal coal, oil sands, , oil and gas, cluster weapons, depleted uranium, biological and chemical weapons, white phosphorus and small arms. Issuers that are classified by the index provider as violating United Nations Global Compact principles (which are widely accepted corporate sustainability principles that meet fundamental responsibilities in areas such as anti-corruption, human rights, labour and environmental) are also excluded from the benchmark index. The benchmark index excludes companies which score below a certain Sustainalytics ESG Rating which are identified by the index provider as being involved in controversies that have a negative ESG impact on their operations and/or products and services based on a Sustainalytics ESG controversy score.
- ▶ The fixed income securities in the Fund's benchmark index will pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the benchmark index.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which based on one or more underlying assets). The Fund may use derivatives for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ Your units will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between the base currency of the Fund (which is Sterling) and any different currencies in which the assets of the Fund are denominated. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your units.
