iShares Environment and Low Carbon Tilt Real Estate Index Fund (UK)

A sub-fund of BlackRock Collective Investment Funds

Class D Accumulating GBP

ISIN: GB00B5BFJG71

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE EPRA Nareit Developed Green Low Carbon Target Index, the Fund's benchmark index (the "Index").
- ▶ The Fund is passively managed and the investment manager has limited discretion to select the Fund's investments and in doing so may take into consideration the Index. The Fund invests in equity securities (e.g. shares) of companies that make up the Index.
- ▶ The Index measures the performance of equity securities of leading property companies listed globally. The Index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the company's weight within the Index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.
- ▶ The Index aims to reflect the performance of a sub-set of equity securities within the FTSE EPRA/NAREIT Developed Index (the "Parent Index") which remain after the index provider has excluded securities using pre-defined ESG screens and weighted securities using an optimisation process, as determined by the index provider. The Index excludes corporate issuers based on their involvement in certain activities deemed by the index provider to have negative environmental or social outcomes based on their involvement in the following business lines/activities (or related activities): small arms, thermal coal, oil sands, tobacco and controversial weapons (including chemical and biological weapons, cluster weapons, anti-personnel mines, nuclear weapons, white phosphorus and depleted uranium). The Index also excludes issuers which are classified as violating the United Nations Global Compact principles (which are widely accepted corporate sustainability principles that meet fundamental responsibilities in areas such as anti-corruption, human rights, labour and environmental). . Remaining constituent weights are then adjusted (tilted) based on targeted percentage improvements (in each case relative to the Parent Index) across three sustainable investment considerations: green building certification (the share of total net leasable area owned and/or managed by a company that is certified as part of an eligible green certification scheme) (target 30% improvement), energy usage (the average modeled energy consumption per square metre of net leasable area owned and/or managed by a company) (target 10% improvement) and carbon emissions intensity (which is the total operational emissions scaled by company value including cash) (target 20% improvement).
- ▶ The Fund uses optimising techniques to achieve a similar return to its Index. These techniques may include the strategic selection of certain securities that make up the Index or other securities which provide similar performance to certain constituent securities. These may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets). The Fund may use derivatives for efficient portfolio management purposes (EPM) (i.e. to reduce risk or costs within the Fund's portfolio, or generate additional income). The Fund may engage in short-term secured lending of its investments to certain eligible third parties to generate additional income and off-set costs.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

Risk and Reward Profile

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in property securities can be affected by the general performance of stock markets and the property sector. In particular, changing interest rates can affect the value of properties in which a property company invests.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2025. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.
