iShares Green Bond Index Fund (IE)

A sub-fund of BlackRock Fixed Income Dublin Funds plc

Class Flexible Accumulating NZD Hedged

ISIN: IE0006QDMN34

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income, which reflects the return of the Bloomberg MSCI Global Green Bond Index, the Fund's benchmark index (Index). The Fund invests predominantly in the fixed income (FI) securities (such as bonds) that make up the Index, the proceeds of which are used to fund projects with direct environmental benefits.
- ▶ It is intended that, at the time of purchase, the FI securities will have received a long term credit rating which complies with the credit rating requirements of the Index, being currently at least investment grade (i.e. meet a specified level of creditworthiness) from Moody's, Standard & Poor's or Fitch Ratings or are deemed, by the investment manager (IM), to be of an equivalent rating. If the credit rating of a FI security is downgraded, the Fund may continue to hold this, until it is practicable to sell the position, in a manner that is in accordance with the requirements of the Index or in the best interests of the Fund.
- ▶ The Index measures the performance of multi-currency denominated, fixed rate, investment grade FI securities issued by corporate and government-related issuers and entities in the securitised sector on a global basis, including emerging markets. To be classified as a green bond for the purpose of the Index and to qualify as providing a direct environmental benefit, a bond's proceeds must fund projects that fall within one or more qualifying environmental categories (as determined by the Index provider) including, but not limited to, alternative energy, energy efficiency, pollution prevention and control, sustainable water, green building and climate adaptation. General purpose bonds are also eligible if 90% of the issuer's activities (as measured by revenues) fall within one or more of the foregoing categories. The Index has no duration target, either as a measure of the average time it takes for a return (both capital and income) to be achieved on the investments held or as a measure of the sensitivity of bond prices to movements in interest rates. For more details, please refer to the Fund's prospectus.
- ▶ The Fund uses techniques for efficient portfolio management purposes or to protect against exchange rate risk or to achieve a similar return to the Index. These techniques may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. They may also include the use of financial derivative instruments (FDI) (i.e. investments the prices of which are based on one or more underlying assets) and units in collective investment schemes to securities with exposures which may not satisfy green bond requirements of the Index.
- ▶ The IM intends to exclude direct investment in issuers of securities which: (1) are engaged in or are otherwise exposed to the production of controversial weapons (including but not limited to cluster munitions, biological-chemical, landmines, depleted uranium, blinding laser or incendiary weapons); or (2) derive a certain portion of their revenue from thermal coal extraction or thermal coal based power generation or (3) have a 'red' MSCI ESG controversy flag. For more details, please refer to the Fund's prospectus.
- ▶ The Fund is passively managed. The IM has limited discretion to select the Fund's investments and in doing so will take into consideration the Index.
- ▶ The Fund will adopt a thematic approach to sustainable investing, this means that it is expected that by investing in a portfolio of securities that as far as possible and practicable consists of the component securities of the Index, it is expected that the Fund will invest in securities linked to a specific theme, in this instance green bonds. The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is Euro. Shares for this class are bought and sold in New Zealand Dollar. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the Fund's underlying portfolio currencies. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is NZD 500,000.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects arbitrage by an investor on the yield of the Fund.

The ongoing charges figure is based on the fixed annualised fees charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** (i) To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges. (ii) Holders in this share class will be subject to additional periodic charges outside of the Fund by way of separate agreement with BlackRock.
