**This document is marketing material.** For Investors in the UK. Investors should read the KIID/PRIIPs document and prospectus prior to investing, and should refer to the prospectus for the funds full list of risks.

**FUND OVERVIEW**

The Fund seeks to track the performance of an index composed of Japanese large, mid and small cap companies.

**KEY BENEFITS**

1. Exposure to the stock market of the third largest global economy
2. Entire market exposure means not missing out on potential growth surprises from often overlooked smaller companies
3. Use at the core of a portfolio to seek long-term growth

**RISK INDICATOR**

**Lower Risk**

Potentially Lower Rewards

**Higher Risk**

Potentially Higher Rewards

**CAPITAL AT RISK:** The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

**KEY RISKS:**

- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
- Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
