FUND OVERVIEW The Fund seeks to track the performance of an index composed of Japanese large, mid and small cap companies. KEY BENEFITS - Exposure to the stock market of the third largest global economy - Entire market exposure means not missing out on potential growth surprises from often overlooked smaller companies - Use at the core of a portfolio to seek long-term growth RISK INDICATOR Lower Risk Potentially Lower Rewards Potentially Higher Rewards Higher Risk 1 2 3 4 5 6 7 CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested. KEY RISKS: - Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies. - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events. - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss. - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
