iShares EURO STOXX 50 ESG UCITS ETF

A sub-fund of iShares V plc

EUR (Acc) Share Class

ISIN: IE000LXEN6X4

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the EURO STOXX 50 ESG Index, the Fund's benchmark index ("Index").
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- ▶ The Index aims to reflect the performance of a sub-set of European securities across market sector leaders in the Eurozone within the EURO STOXX 50 Index (the "Parent Index"), which are issued by companies with higher environmental, social and governance ("ESG") ratings than other peers within the Parent Index. Stocks are selected from the largest companies of the Parent Index that meet specific criteria according to the Index methodology.
- ▶ The Index applies exclusions in line with EU Paris-Aligned Benchmarks as set out in Commission Delegated Regulation (EU) 2020/1818.
- ▶ The Index also seeks to exclude companies based on ESG exclusionary criteria. The Index seeks to exclude issuers from the Parent Index based on their involvement in certain business lines/activities, as outlined in the Index description of the Fund in the Fund's Prospectus. The Index also excludes issuers with a poor ESG rating.
- ▶ The Index further excludes issuers that are not in compliance with the ISS ESG Norms Based Screening, which assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti-corruption established in the UN Global Compact (UNGC) and the Organisation for Economic Co-operation and Development (OECD) Guidelines, as identified by ISS-ESG.
- ▶ The Index seeks to achieve an improved ESG score over that of the Parent Index by excluding from the Index 20% of companies with the lowest ESG scores.
- ▶ The Fund adopts a best-in-class approach to sustainable investing, this means that it is expected that the Fund will invest in the best issuers from an ESG perspective within each relevant sector of activities covered by the Index. The Index is market capitalisation weighted and rebalances on a quarterly basis. Index constituents are subject to a 10% cap for each issuer.
- ▶ The Fund intends to replicate the Index by holding equity securities, which make up the Index, in similar portions to it. The investment manager may use Financial Derivative Instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. FDIs may be used for direct investment purposes.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund’s prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
