iShares € Green Bond UCITS ETF

A sub-fund of iShares II plc

EUR (Acc) Share Class

ISIN: IE0001ZO7033

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Bloomberg MSCI Euro Green Bond SRI including Nuclear Power Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index and comply with its credit rating requirements.
- ▶ The Index measures the performance of Euro denominated, fixed-rate, investment grade, government, government-related (supranational), corporate and securitized bonds classified as "green bonds" in accordance with the Index methodology, and excludes issuers based on the index provider's environmental, social and governance ("ESG"), socially responsible investment ("SRI") and other criteria. Green bonds are defined by the index provider as FI securities whose proceeds are exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes.
- ▶ The Index will comprise FI securities which, at the time of their inclusion, will be investment grade (i.e. meet a specified level of creditworthiness). They will pay income according to a fixed rate of interest and have a minimum amount outstanding of €300 million. The Index does not apply a minimum remaining time until maturity requirement (i.e. the time until the bonds become due for repayment).
- ▶ The Index is market capitalisation weighted (with a cap on each treasury, sovereign and supranational issuer of 19.5% and each corporate issuer of 4.5%) and rebalances on a monthly basis. Market capitalisation is the market value of the outstanding bond issuance.
- ▶ The Fund's investments will, at the time of purchase, comply with the credit, SRI and/or ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell the position.
- ▶ The Fund uses optimising techniques to achieve a similar return to its Index. These may include the strategic selection of certain securities that make up the Index or other FI securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- ▶ The Fund will adopt a thematic approach to sustainable investing, this means that it is expected that by investing in a portfolio of securities that as far as possible and practicable consists of the component securities of the Index, it is expected that the Fund will invest in securities linked to a specific theme, in this instance green bonds.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in Euro, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
 - ▶ The risk category shown is not guaranteed and may change over time.
 - ▶ The lowest category does not mean risk free.
 - ▶ The Share Class is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
 - The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
 - ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund’s prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
