# iShares iBonds Dec 2029 Term \$ Treasury UCITS ETF

A sub-fund of iShares V plc

USD Accu

ISIN: IE000550M853

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

## Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund, which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the ICE 2029 Maturity US Treasury UCITS Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) that make up the Index.
- ▶ The Index is designed to measure the performance of US Treasury notes and bonds which mature between 01/01/29 and 02/12/29, inclusive. To be eligible for inclusion in the Index, securities must have a fixed coupon schedule and an amount outstanding, excluding amounts held in the Federal Reserve's SOMA account (the System Open Market Account contains assets acquired through operations in the open market that are used as a store of liquidity by the Federal Reserve Bank.) of at least \$1 billion. Inflation-linked debt and strips are excluded from the Index; however, the amounts outstanding of eligible securities are not reduced by any coupon portions that have been stripped. US Treasury bills are not eligible for inclusion in the Index except during the cash reinvestment period in the maturity year.
- ▶ It is a term of investment in the Fund that Shareholders on 02/12/29 will have their shares redeemed without further notice or shareholder approval on 03/12/29.
- ▶ The Index is market capitalisation weighted and rebalances on a monthly basis. Market capitalisation is the market value of the outstanding bond issuance. Index constituents are market capitalization weighted based on amounts outstanding reduced by amounts held in the Federal Reserve's SOMA account, times price, plus accrued interest.
- ▶ The Fund uses optimising techniques to achieve a similar return to its Index. These techniques may include the strategic selection of certain securities that make up the Index or other Fixed Income securities which provide similar performance to certain constituent securities. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). FDIs may be used for direct investment purposes.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index. This Fund may not be appropriate for investors who plan to withdraw their money before 02/12/29.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

## Risk and Reward Profile

- Fixed maturity products are designed for investors to hold the shares/units for the full period of the fund, otherwise the loss of capital may be greater. The fund may also see an enhanced risk to early closure. Given the changing nature of the assets held, the risks incurred by investors will differ during each period.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
  - Defined Term Fund: The Fund may be more concentrated in certain industries or sectors than a fund that tracks a broader index. The composition and risk and reward profile of the Fund will be different during its last year as the corporate bonds mature. The Fund may not be suitable for new investment in its final year or in the period approaching its final year.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

\*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

\*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund’s prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

| One-off charges taken before or after you invest                                                                                     |         |
