iShares MSCI Japan SRI UCITS ETF

A sub-fund of iShares IV plc

Hedged EUR Accu

ISIN: IE000QWO5FT3

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income, which reflect the return of the MSCI Japan SRI Select Reduced Fossil Fuel Index (the "Index").
- ▶ The Share Class, via the Fund, is passively managed and aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the Index.
- ▶ The Index measures the performance of a sub-set of equity securities (e.g. shares) issued by Japanese companies within the MSCI Japan Index ("Parent Index") with higher Environmental, Social and Governance ("ESG") ratings than other sector peers within the Parent Index, based on a series of exclusionary and ratings based criteria.
- ▶ Companies are excluded if they are involved in certain business lines/activities, as outlined in the Fund's Prospectus. Companies that are in violation of United Nations Global Compact principles or OECD Guidelines for Multinational Enterprises are also excluded from the Index. The remaining companies are rated by the index provider based on their ability to manage ESG risks and opportunities and are given a MSCI ESG rating which determines their eligibility for inclusion. Companies are also excluded based on an MSCI ESG controversy score (very severe).
- ▶ The Fund may obtain limited exposure to securities which do not satisfy the ESG criteria
- ▶ The Fund adopts a best-in-class approach to sustainable investing, this means that it is expected that the Fund will invest in the best issuers from an ESG / Socially Responsible Investment ("SRI") perspective (based on the ESG/SRI criteria of the Index) within each relevant sector of activities covered by the Index.
- ▶ The Index targets a 25% representation from each Global Industry Classification Standard sector within the Parent Index. Eligible companies in each sector are ranked by the criteria as outlined in the Fund's prospectus. Eligible companies from each sector are then included in the Index in a specific order, as defined in the index methodology, up to the 25% representation.
- ▶ The Index is free float adjusted market capitalisation weighted meaning Constraints to limit deviation from the constituent and sector weights of the Index are applied. The Fund's investment in the equity securities that make up the Index will, at the time of purchase, comply with the ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- ▶ The Fund intends to replicate the Index by holding the equity securities which make up the Index in similar proportions to it. The investment manager may use Financial Derivative Instruments ("FDIs") for direct investment purposes.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the Fund's costs.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ The Fund's base currency is US Dollar. Shares for this Share Class are denominated in Euro. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the Fund's underlying portfolio currencies. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
 - ▶ The risk category shown is not guaranteed and may change over time.
 - ▶ The lowest category does not mean risk free.
 - ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - The benchmark index's ESG rating assessment of an issuer's performance is intended to be relative to the standards of the issuer's industry peers. No exclusion (apart from controversial weapons) is made on the basis of how ethical a particular industry/sector is perceived to be. Investors should therefore make a personal ethical assessment of the Index prior to investing in the Fund.
- ▶ Particular risks not adequately captured by the risk indicator include:
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund’s prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
