**iShares China CNY Bond UCITS ETF**

A sub-fund of iShares IV plc

**GBP Hedged (Dist) Share Class**

ISIN: IE00BMZ17Y47

Exchange Traded Fund (ETF)

Manager: BlackRock Asset Management Ireland Limited

**Objectives and Investment Policy**

- ▶ The Share Class is a share class of a Fund which aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Bloomberg Barclays China Treasury + Policy Bank Index, the Fund's benchmark index (Index).
- ▶ The Share Class, via the Fund, is passively managed, and aims to invest so far as possible and practicable in the fixed income (FI) securities (such as bonds) issued by the issuers that make up the Index. The FI securities, will at the time of inclusion in the Index, comply with the credit rating requirements of the Index.
- ▶ The Index measures the performance of CNY denominated bonds issued by the Ministry of Finance of the People's Republic of China (PRC), and debt issued by Chinese policy banks (PRC government agencies which are not guaranteed by the government), that are listed on the China Interbank Bond Market (CIBM). They have a par value of at least CNY5 billion and a remaining maturity of at least 1 year at the time of inclusion in the Index.
- ▶ The Index does not impose any minimum credit rating requirements other than excluding FI securities that are in default. Should the FI securities default, the Fund may continue to hold them until they cease to form part of the Index and it is possible and practicable in the Investment Manager's view to sell the position. The Fund intends to replicate the Index by holding the bond issues of all issuers which make up the Index, in a similar proportion to the weightings of the issuers in the Index. While the Fund will invest in all issuers of bond issues comprising the Index, it may not invest in every bond issue in the Index and may invest in bond issues outside of the Index (of the issuers comprising the Index) with a similar performance and matching risk profile to the bond issues in the Index.
- ▶ The investment manager may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objectives. FDIs may be used for direct investment purposes.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be distributing shares (i.e. income will be paid on the shares semi-annually).
- ▶ The Fund's base currency is US Dollar. Shares for this Share Class are denominated in Sterling. The performance of your shares may be affected by this currency difference.
- ▶ Your shares will be "hedged" with the aim of reducing the effect of exchange rate fluctuations between their denominated currency and the Fund's underlying portfolio currencies. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

**Risk and Reward Profile**

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated two due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
  - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.

- Investments in onshore Chinese securities via Stock Connect or RQFII are subject to quotas. Should the Fund's demand exceed the quota, buy orders will be rejected. This may result in subscriptions being suspended and the Shares of the Fund trading at a significant premium or discount to Net Asset Value on any stock exchange on which they are admitted to trading.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
  - The PRC/Ireland tax treaty provides for exemption from Chinese capital gains tax on sales of the Fund's investments in Chinese securities and the Fund is expected to qualify for this exemption. However, there is a risk that the PRC tax authorities could either consider the Fund not to be eligible for the PRC/Ireland tax treaty, or classify capital gains on sales of the Fund's FI securities as interest which does not qualify for tax exemption and seek to collect tax on a retrospective basis, which would affect the value of the investment.

## Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

\*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

\*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
