iShares MSCI ACWI ex U.S. ETF	\$34	0.32%

## How did the Fund perform last year?

- For the reporting period ended July 31, 2025, the Fund returned 14.02%.
- For the same period, the MSCI ACWI ex USA Index (Net) returned 14.73%.

## What contributed to performance?

Chinese equities were the primary contributor to the Fund’s return during the reporting period. Investor sentiment improved due to government stimulus to stimulate the economy and boost demand even amid rising trade tensions. Notably, a multinational technology and entertainment conglomerate in the interactive media and services sector gained due to strong growth in its gaming and advertising units. Among financials stocks, rising dividend payouts and historically low valuations further supported diversified banks. In Germany, optimism surrounding a historic fiscal stimulus plan targeting infrastructure and defense supported firms in the industrials space. In the United Kingdom, banking stocks benefited from strong balance sheets, robust performance from investment banking units, and solid trading activity.

## What detracted from performance?

A Danish healthcare company detracted from the Fund’s performance during the reporting period. The firm reduced its sales growth outlook after its blockbuster weight loss drug faced increased competition from lower-cost alternatives.
