What were the Fund costs for the last year? (based on a hypothetical \$10,000 investment)

Fund name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
iShares Floating Rate Bond ETF	\$15	0.15%

How did the Fund perform last year?

- For the reporting period ended October 31, 2025, the Fund returned 5.16%.
- For the same period, the Bloomberg U.S. Universal Index returned 6.51% and the Bloomberg US Floating Rate Note<5 Years Index returned 5.25%.

What contributed to performance?

Anticipation of rate cuts caused spreads (the difference in the yield between two bonds with similar maturities but different credit qualities) on corporate debt to significantly narrow during the reporting period. Mixed economic signals and ongoing global trade tensions also influenced bond returns, while the late-period U.S. government shutdown added to market volatility. After cutting rates in December of 2024, the Federal Reserve held policy rates steady through the first part of the year, before cutting rates by 25 basis points in both September and October 2025 as evidence of a cooling labor market outweighed persistent, though elevated, inflation concerns.

During the reporting period, by sector, banking issues in the financial sector contributed the most to performance.

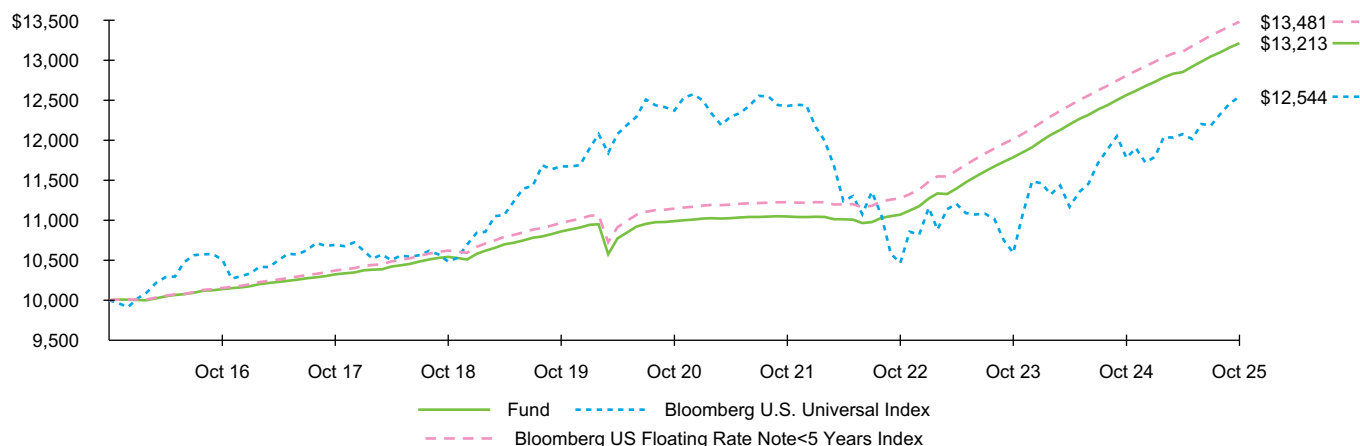

What detracted from performance?

There were no significant detractors from the Fund’s return during the reporting period.
