Fund name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
iShares Large Cap Max Buffer Jun ETF	\$49 ^(a)	0.47% ^(a)

^(a) Excludes fees and expenses incurred indirectly as a result of investments in underlying funds.

How did the Fund perform last year?

- For the reporting period ended July 31, 2025, the Fund returned 10.21%.
- For the same period, the S&P Total Market Index returned 15.73% and the S&P 500 Index returned 16.33%.

What contributed to performance?

Information technology stocks in the U.S. large-capitalization space were the largest driver of performance for the iShares Core S&P 500 ETF (“the underlying ETF”) during the reporting period. Semiconductor stocks gained amid continued demand for artificial intelligence (“AI”), and generative AI workloads in data centers, while systems software firms benefited from strong growth in their respective cloud businesses and increasing adoption of AI technologies. Stocks in the financials sector were also notable contributors, benefiting from resilient equity markets, rising assets under management, strong trends in wealth management, and high trading volumes. The Fund continued to accomplish its goal of delivering upside performance up to its approximate caps in line with the underlying ETF, as well as protecting against the majority of the losses for the underlying ETF during times of market weakness.

What detracted from performance?

Since Fund reset in June 2025, the Fund returned 0.42%, while the S&P 500 Index returned 2.24%. Given the Fund has 11 months remaining in its outcome period, the value of the options detracted from performance.
