This report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the last year?

(based on a hypothetical \$10,000 investment)

Fund name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
iShares New York Muni Bond ETF	\$15	0.15%

How did the Fund perform last year?

- For the reporting period ended February 28, 2026, the Fund returned 4.45%.
- For the same period, the ICE BofA US Municipal Securities Index returned 4.77%, the ICE AMT-Free New York Plus Municipal Index (Spliced) returned 4.49% and the ICE AMT-Free US National Municipal index returned 4.71%.

What contributed to performance?

U.S. bond markets gained during the reporting period, supported by a resilient domestic economy despite conflicting data. The Federal Reserve (“Fed”) reduced rates by 75 basis points across three 25 basis point rate cuts in late 2025, prompted by a cooling labor market amid elevated inflation. The beginning of the reporting period was characterized by volatility for municipal bonds as uncertainty grew around potential modifications of their tax-exempt status and spurred a surge in issuance. Ultimately, these concerns were alleviated when the tax-exempt status of municipals was preserved under the One Big Beautiful Bill Act (OBBBA). For the reporting period, municipal bonds delivered solid performance, benefiting from stable credit fundamentals, limited supply, and appealing tax-equivalent yields.

What detracted from performance?

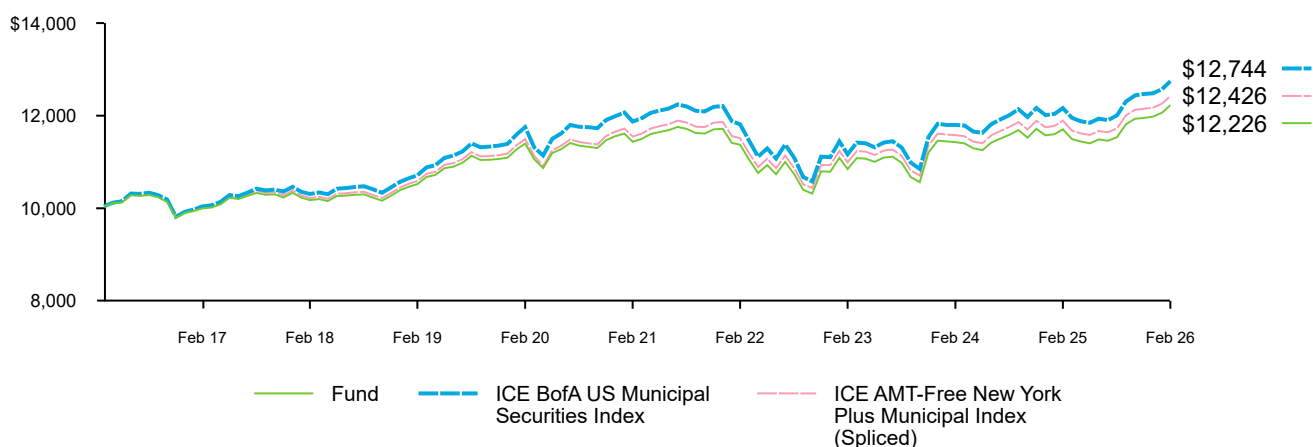

There were no notable detractors from the Fund’s performance during the reporting period.
