The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.iShares.com or www.blackrock.com. Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. eastern time (when NAV is normally determined for most ETFs), and do not represent the returns you would receive if you traded shares at other times.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.iShares.com or www.blackrock.com. Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market returns are based upon the midpoint of the bid/ask spread at 4:00 p.m. eastern time (when NAV is normally determined for most ETFs), and do not represent the returns you would receive if you traded shares at other times. Performance shown reflects fee waivers and/or expense reimbursements by the investment advisor to the fund for some or all of the periods shown. Performance would have been lower without such waivers.

iShares Fixed Income Product Overview

Yield curves—differing credit qualities (as of 9/30/17)

With a comprehensive suite of fixed income iShares ETFs, investors can build a fixed income allocation based on risk/return objectives, balancing yield, duration and credit quality.

Source: BlackRock, as of 9/30/17.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted.

iShares Fixed Income Product Overview

(as of 10/13/17)

Carefully consider the Funds' investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the Funds' prospectuses or, if available, the summary prospectuses which may be obtained by visiting www.iShares.com or www.blackrock.com. Read the prospectus carefully before investing.

Investing involves risk, including possible loss of principal.

Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Non-investment-grade debt securities (high-yield/junk bonds) may be subject to greater market fluctuations, risk of default or loss of income and principal than higher-rated securities.

Tax Equivalent Yields are calculated using the highest federal individual income tax rate of 43.4% (inclusive of the Medicare Contribution Tax).

The Funds are distributed by BlackRock Investments, LLC (together with its affiliates, "BlackRock").

The iShares Funds are not sponsored, endorsed, issued, sold or promoted by JPMorgan Chase & Co. or Markit Indices Limited. Neither of these companies make any representation regarding the advisability of investing in the Funds. BlackRock is not affiliated with the companies listed above.

Weighted Average Maturity: The average length of time to the repayment of principal for the securities in the fund. This metric considers the likelihood that bonds will be called or prepaid before the scheduled maturity date.

Effective Duration: Measures the responsiveness of a portfolio's price to change in interest rates. This calculation adjusts for changes in a bond's projected cash flows as a result of interest rate changes, considering the likelihood that bonds will be called or prepaid before the scheduled maturity date, and is based on proprietary BlackRock models. Where appropriate, Effective Duration has been adjusted for impacts associated with leverage, hedging transactions, and non-bond holdings, including derivatives.

Option Adjusted Spread: The weighted average incremental yield earned over similar duration US Treasuries, measured in basis points. This metric considers the likelihood that bonds will be called or prepaid before the scheduled maturity date.

30 Day SEC Yield: A standard calculation of yield introduced by the SEC in order to provide fairer comparison among funds. This yield reflects the interest earned after deducting the fund's expenses during the most recent 30-day period by the average investor in the fund. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days.

Unsubsidized 30-Day SEC Yield: Represents what a fund's 30-Day SEC Yield would have been had no fee waiver or expense reimbursement been in place over the period.

Tax Equivalent SEC Yield: Tax equivalent yield (TEY) is used by investors to compare yields on taxable and tax-exempt securities after accounting for taxes. TEY represents the yield a taxable bond would have to earn in order to match, after taxes, the yield available on a tax-exempt municipal bond. The highest Federal individual income tax rates are assumed (43.4%, inclusive of Medicare Contribution Tax) with State rates applied to state-specific muni funds (CMF: 50.9%, NYF: 50.6%).
