The iShares S&P 500 Value ETF seeks to track the investment results of an index composed of large-capitalization U.S. equities that exhibit value characteristics.

WHY IVE?
1 Exposure to large U.S. companies that are thought to be undervalued by the market relative to comparable companies
2 Targeted access to a specific category of large-cap domestic stocks
3 Use to tilt your portfolio towards value stocks

GROWTH OF 10,000 USD SINCE INCEPTION

The Growth of $10,000 chart reflects a hypothetical $10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses were deducted.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.iShares.com or www.blackrock.com.

Beginning 8/10/20, the market price returns are calculated using the closing price. Prior to 8/10/20, the market price returns were calculated using the midpoint of the bid/ask spread at 4:00 PM ET. The returns shown do not represent the returns you would receive if you traded shares at other times.
**GLOSSARY**

**Beta** is a measure of the tendency of securities to move with the market as a whole. A beta of 1 indicates that the security’s price will move with the market. A beta less than 1 indicates the security tends to be less volatile than the market, while a beta greater than 1 indicates the security is more volatile than the market.

The **price to earnings ratio (P/E)** is a fundamental measure used to determine if an investment is valued appropriately. Each holding’s P/E is the latest closing price divided by the latest fiscal year’s earnings per share. Negative P/E ratios are excluded from this calculation. For hedged funds, the underlying fund’s value is shown.

The **price to book (P/B) value ratio** is a fundamental measure used to determine if an investment is valued appropriately. The book value of a company is a measure of how much a company’s assets are worth assuming the company’s debts are paid off. Each holding’s P/B is the latest closing price divided by the latest fiscal year’s book value per share. Negative book values are excluded from this calculation. For hedged funds, the underlying fund’s value is shown.

---

The **price to book (P/B) value ratio** is a fundamental measure used to determine if an investment is valued appropriately. The book value of a company is a measure of how much a company's assets are worth assuming the company's debts are paid off. Each holding's P/B is the latest closing price divided by the latest fiscal year's book value per share. Negative book values are excluded from this calculation. For hedged funds, the underlying fund's value is shown.
SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund’s investment objective, do not change a fund’s investment objective or constrain the fund’s investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund’s investment strategy, please see the fund’s prospectus.

All data is from MSCI ESG Fund Ratings as of 07-Jan-2022, based on holdings as of 30-Nov-2021. As such, the fund’s sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund’s gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund’s gross weight; the absolute values of short positions are included but treated as uncovered), the fund’s holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY:

- **MSCI ESG Fund Rating (AAA-CCC):** The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).
- **MSCI ESG Quality Score - Peer Percentile:** The fund’s ESG Percentile compared to its Lipper peer group.
- **Fund Lipper Global Classification:** The fund peer group as defined by the Lipper Global Classification.
- **Funds in Peer Group:** The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.
- **MSCI ESG Quality Score (0-10):** The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.
- **MSCI ESG % Coverage:** Percentage of a fund's holdings that have MSCI ESG ratings data.
- **MSCI Weighted Average Carbon Intensity (Tons CO2E/$M SALES):** Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per $1 million in sales across the fund’s holdings. This allows for comparisons between funds of different sizes.

Certain information contained herein (the “Information”) has been provided by MSCI ESG Research LLC, a RIA under the Investment Advisers Act of 1940, and may include data from its affiliates (including MSCI Inc. and its subsidiaries (“MSCI”)), or third party suppliers (each an “Information Provider”), and it may not be reproduced or redisseminated in whole or in part without prior written permission.
