

NAIC-DESIGNATED BOND & PREFERRED STOCK ETFs

Tools for insurers

BlackRock offers a comprehensive range of iShares ETFs with National Association of Insurance Commissioners (“NAIC”) Designations to help insurance companies meet their general account investment needs.

NAIC-designated bond ETFs help insurers by allowing:

- More favorable risk-based capital (RBC) requirements treatment.
- Them to consider ETFs to be “long-term bond issuer obligations” as opposed to “common stock” on statutory (Schedule D) filings.
- Favorable accounting treatment through the election of systematic value.

iShares bond ETFs provide the benefits of:

- **Simplicity** — Gain diversified access to broad and targeted bond exposures in a single trade.
- **Liquidity** — On-exchange trading of bond ETFs is independent of the cash bond market and can act as an additional source of liquidity.
- **Efficiency** — Compared to transacting in individual bonds, bond ETFs can offer significant trade cost savings.

iShares bond ETFs on the NAIC’s SVO-Identified Bond ETF List

Multi-Sector			
Fund Name	Ticker	NAIC Designation	Designation date

Fund Name	Ticker	NAIC Designation	Designation date
iShares Preferred and Income Securities ETF	PFF	4.B	June 2022

*Preliminary NAIC Designation. All other ETFs in this list have been assigned an official NAIC Designation. Preliminary NAIC Designations are the intellectual property of the National Association of Insurance Commissioners (NAIC) and are redistributed here under license. A Preliminary NAIC Designation is an opinion of the NAIC Securities Valuation Office (SVO) of the probable credit quality Designation that would be assigned by the SVO to an investment if purchased by an insurance company and reported to the SVO. A Preliminary NAIC Designation is only one of the regulatory factors considered by the SVO as part of its analysis of probable regulatory treatment under the Regulatory Treatment Analysis Service. A full discussion of such other regulatory factors is set forth in the Regulatory Treatment Analysis Service (RTAS) letter provided to iShares. A Preliminary NAIC Designation cannot be used to report the ETF to state insurance regulators. However, the purchasing insurance company may obtain an NAIC Designation for the ETF by filing the security and final documents for the ETF with the SVO. The indication of probable regulatory treatment indicated by a Preliminary NAIC Designation is not a recommendation to purchase the ETF and is not intended to convey approval or endorsement of the ETF Sponsor or the ETF by the NAIC. NAIC Designations are the intellectual property of the NAIC and are redistributed here under license.

An NAIC Designation is a proprietary symbol used by the SVO to denote a category or band of credit risk (i.e., the likelihood of repayment in accordance with a written contract) for an issuer or for a security. NAIC Designations may be notched up or down to reflect the position of a specific liability in the issuer's capital structure and/or the existence of other non-payment risk in the specific security. Under NAIC reporting rules, shares of an ETF are presumed to be reportable as common stock. The SVO may classify an ETF as a bond or preferred stock and assign it an NAIC Designation if it meets defined criteria. For a discussion of these criteria please call the SVO or refer to the Purposes and Procedures Manual of the NAIC Investment Analysis Office. The assignment of an NAIC Designation is not a recommendation to purchase the ETF and is not intended to convey approval or endorsement of the ETF Sponsor or the ETF by the NAIC. The NAIC does not endorse or recommend any securities or products, including iShares ETFs. NAIC Designations are issued for specific regulatory purposes and these Designations are not equivalent to credit ratings issued by nationally recognized statistical rating organizations. NAIC Designations are suitable only for NAIC members.

Fund list as of February 2023.

Carefully consider the Funds' investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the Funds' prospectuses or, if available, the summary prospectuses which may be obtained by visiting www.iShares.com or www.blackrock.com. Read the prospectus carefully before investing. Investing involves risk, including possible loss of principal.

Fixed income risks include interest-rate and credit risk. Typically, when interest rates rise, there is a corresponding decline in bond values. Credit risk refers to the possibility that the bond issuer will not be able to make principal and interest payments. Funds that invest in preferred stocks, asset- or mortgage-backed securities, municipal bonds, privately issued securities and / or other funds or ETFs may be subject to additional risks and / or expenses. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency and its return and yield will fluctuate with market conditions. Please see each fund's prospectus for more information on risks.
