Source: BlackRock, Morningstar as of 4/30/2026. Morningstar percentile rankings for iShares U.S. Equity Factor Rotation Active ETF as of 4/30/2026. The comparison universe is ETFs and mutual funds within the fund's Morningstar category and based on total return. Total return represents changes to the NAV and accounts for distributions from the funds (excluding any applicable sales charges). *Sharpe ratio measures the return of an investment adjusted for the riskiness of the investment. Performance data represents past performance and does not guarantee future results. Investment return and principal value will fluctuate with market conditions and may be lower or higher when you sell your shares. Current performance may differ from the performance shown. For most recent month-end performance, see www.iShares.com. For standardized performance, see the end of this document. Past performance does not guarantee future results.

The performance quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.iShares.com or www.blackrock.com.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the fund. Any applicable brokerage commissions will reduce returns. Beginning August 10, 2020, market price returns for BlackRock and iShares ETFs are calculated using the closing price and account for distributions from the fund. Prior to August 10, 2020, market price returns for BlackRock and iShares ETFs were calculated using the midpoint price and accounted for distributions from the fund. The midpoint is the average of the bid/ask prices at 4:00 PM ET (when NAV is normally determined for most ETFs). The returns shown do not represent the returns you would receive if you traded shares at other times.

Important Information

Carefully consider the Funds' investment objectives, risk factors, and charges and expenses before investing. This and other information can be found in the Funds' prospectuses or, if available, the summary prospectuses which may be obtained by visiting www.iShares.com or www.blackrock.com. Read the prospectus carefully before investing. Investing involves risk, including possible loss of principal.

There can be no assurance that performance will be enhanced or risk will be reduced for funds that seek to provide exposure to certain quantitative investment characteristics ("factors"). Exposure to such investment factors may detract from performance in some market environments, perhaps for extended periods. In such circumstances, a fund may seek to maintain exposure to the targeted investment factors and not adjust to target different factors, which could result in losses.

There is no guarantee that the classification system used to determine the Factor Rotation model for the U.S. Equity Factor Rotation Active ETF will achieve its intended results. The fund may engage in active and frequent trading of its portfolio securities which may result in higher transaction costs to the fund. The fund is actively managed and does not seek to replicate the performance of a specified index.
